CONTENTS OF VOLUME THIRTY

NUMBER 1. *Radioimmunoassay and Saturation Analysis*

Scientific Editor: P. H. SÖNKSEN

		PAGE
Introduction	*J. D. N. Nabarro*	1
Methods		
Basic principles and theory	*R. P. Ekins*	3
Standardization and standards	*D. R. Bangham & P. Mary Cotes*	12
Preparation and assessment of radioactive tracers	*W. M. Hunter*	18
Production of antibodies and binding reagents	*J. H. L. Playfair, B. A. L. Hurn & Dennis Schulster*	24
Separation techniques in saturation analysis	*J. G. Ratcliffe*	32
Immunoassay in the diagnostic laboratory	*G. Challand, D. Goldie & J. Landon*	38
The immunoradiometric assay and related techniques	*J. S. Woodhead, G. M. Addison & C. N. Hales*	44
Applications		
Steroids	*V. H. T. James & S. L. Jeffcoate*	50
Pituitary and placental glycopeptide hormones	*H. S. Jacobs & N. F. Lawton*	55
Hormones of the gastrointestinal tract	*S. R. Bloom*	62
Tumour-associated antigens	*K. D. Bagshawe*	68
Posterior pituitary peptides	*T. Chard & M. J. Martin*	74
Pharmacology	*V. Marks, B. A. Morris & J. D. Teale*	80
Haematology	*P. A. Newmark & Y. B. Gordon*	86
Viruses	*C. H. Cameron & D. S. Dane*	90
Thyroid hormones	*C. W. Burke & C. J. Eastman*	93

Notes on Contributors 99

Glossary 103

NUMBER 2. *Development and Regeneration in the Nervous System*

Scientific Editors: R. M. GAZE & M. J. KEATING

		PAGE
Introduction	*J. Z. Young*	105
Axon and cell numbers in the developing nervous system	*M. C. Prestige*	107
Cellular responses to axotomy and to related procedures	*W. E. Watson*	112
Neuronal specificity	*R. M. Gaze*	116
Selective innervation of muscle	*R. F. Mark*	122
Influence of metabolic factors on brain development	*Robert Balázs*	126
An immunological approach to regeneration in the central nervous system	*M. Berry & A. C. Riches*	135
Plasticity of synapses	*B. G. Cragg*	141
The role of visual function in the patterning of binocular visual connexions	*M. J. Keating*	145
Development of functional connexions in the mammalian visual system	*Colin Blakemore*	152
Causation of neural tube defects: clues from epidemiology	*Ian Leck*	158
Vulnerability of developing brain and behaviour	*John Dobbing & J. L. Smart*	164
Early malnutrition, growth and mental development in man	*Jack Tizard*	169
Development of infant behaviour	*T. G. R. Bower*	175
Mental retardation and behavioural change	*A. D. B. Clarke & Ann M. Clarke*	179
Remyelination in relation to clinical lesions of the central nervous system	*W. I. McDonald*	186

Notes on Contributors 190

Book Reviews 192

NUMBER 3. *Research in Medical Care*

Scientific Editor: W. W. HOLLAND

		PAGE
Introduction	*W. W. Holland & E. G. Knox*	195
Organization of health services research	*Sir Douglas Black*	199
Evaluation of health information systems	*M. R. Alderson*	203
Studies of general practice (demand, need, quality)	*J. D. E. Knox & D. C. Morrell*	209
Sociology of prescribing	*Peter A. Parish*	214
Studies of patients	*Ann Cartwright*	218
Evaluating the role of the community hospital	*A. E. Bennett*	223
The hospital: towards a rational use	*Vera Carstairs & M. A. Heasman*	228
Demand for laboratory services	*J. S. A. Ashley*	234
Quality control techniques in laboratory services	*T. P. Whitehead*	237
Experiments in medical care	*M. W. Adler, K. Dunnell & J. M. Weddell*	242
Research into nursing services	*Lisbeth Hockey*	248
The cost-benefit approach	*Alan Williams*	252
The operational research approach to problem solving	*J. Luckman & J. Stringer*	257
Balance of care: some mathematical models of the National Health Service	*A. G. McDonald, G. C. Cuddeford & E. M. L. Beale*	262
Studies of health services organization	*Maureen Dixon & Elliott Jaques*	271
Research in health education	*W. T. Jones & Helene Grahame*	276

Notes on Contributors 282

Book Reviews 285

INDEX TO VOLUME THIRTY

Names printed in capitals are those of authors who have contributed papers. Titles of books are printed in italics.

A

Accidents in the home, preventive education, 280
ADDISON, G. M., *see* WOODHEAD, J. S., 44
Adenosine 3′:5′-cyclic monophosphate receptors, 30
Adjuvants, 27
ADLER, M. W., DUNNELL, K. & WEDDELL, J. M.: Experiments in medical care, 242
ALDERSON, M. R.: Evaluation of health information systems, 203
Aminopterin as cause of neural tube defects, 162
Amphetamines, radioimmunoassay, 84
Anderson, J. L., *see* Cartwright, A., 287
Androgenization, effect on developing brain, 129
Antibodies, antiviral, radioimmunoassay, 92
—— genes, 25
—— production, basic immunological principles, 24
—— specific, isolation for immunoradiometric assay, 44
Anticonvulsants, radioimmunoassay, 84
Antigens, carcino-embryonic, characteristics, 72
—— cerebral, 136
—— labelled, preparation for radioimmunoassay, 18
—— labelled preparations, assessment, 19
—— sequestered, 135
—— tumour-associated, radioimmunoassay, 68
—— viral, radioimmunoassay, 90
Antihaemophilic factor, radioimmunoassay, 87
Antisera, preparation, practical problems, 26
ASHLEY, J. S. A.: Demand for laboratory services, 234
Auditory–motor localization, in infants, 176
Axon numbers in developing nervous system, 107
Axotomy, nerve cell response, 112

B

BAGSHAWE, K. D.: Tumour-associated antigens, 68
BALÁZS, R.: Influence of metabolic factors on brain development, 126
—— & Cremer, J. E. (editors): *Metabolic compartmentation in the brain*, 192
BANGHAM, D. R. & COTES, P. M.: [Radioimmunoassay and saturation analysis;] standardization and standards, 12
Barbiturates, radioimmunoassay, 84
Barnard, K. & Lee, K. (editors): *NHS reorganisation: issues and prospects*, 290
BEALE, E. M. L., *see* McDONALD, A. G., 262
Behaviour, development in infants, 175
—— effects of early brain growth restriction on, 165
—— effects of mental retardation, 179
—— *Mental retardation and behavioural research*, 192
BENNETT, A. E.: Evaluating the role of the community hospital, 223
BERRY, M. & RICHES, A. C.: An immunological approach to regeneration in the central nervous system, 135
Binding protein, 30, 50, 87
—— reagents, production, 28
Biographical notes on contributors, 99, 190, 282
BLACK, D.: Organization of health services research, 199
BLAKEMORE, C.: Development of functional connexions in the mammalian visual system, 152
BLOOM, S. R.: Hormones of the gastrointestinal tract, 62
BOWER, T. G. R.: Development of infant behaviour, 175
Brain antigens, 136
—— —— immune response to, 138
—— cell formation, 126
—— developing, vulnerability, 165
—— development, influence of metabolic factors, 126
—— growth restriction, lasting physical effects, 165
—— maturation, effects of metabolic factors, 128
—— *Metabolic compartmentation in the brain*, 192
British Pharmaceutical Codex 1973, 10th ed., 194
British Pharmacopoeia 1973, 12th ed., 194
Brocklehurst, J. C. (editor): *Textbook of geriatric medicine and gerontology*, 287
Brown, R. G. S.: *The changing National Health Service*, 285
Brunel Health Services Organization Project: *Hospital organization: progress report*, 285
—— research conferences on health services, 273
BURKE, C. W. & EASTMAN, C. J.: Thyroid hormones, [radioimmunoassay], 93

C

Caird, F. I. & Judge, T. G.: *Assessment of the elderly patient*, 287
CAMERON, C. H. & DANE, D. S.: Viruses, [radioimmunoassay], 90
Cancer diagnosis, radioimmunoassay of tumour-associated antigens, 70
—— education campaigns, 280
Cannabis, radioimmunoassay, 84

INDEX TO VOLUME THIRTY

McLachlan, G. (editor): *The future—and present indicatives*, 290
Malnutrition, early, effects on growth and mental development, 169
—— severe, effects, 172
MARK, R. F.: Selective innervation of muscle, 122
MARKS, V., MORRIS, B. A. & TEALE, J. D.: Pharmacology; [application of radioimmunoassay and saturation analysis techniques], 80
MARTIN, M. J., *see* CHARD, T., 74
Maxwell, C.: *Clinical research for all*, 285
Medical care, ambulatory patients, 232
—— —— classification of patients, 231
—— —— cost-benefit analysis, 252
—— —— experiments, 242
—— —— operational research approach to problem solving, 257
—— —— organization, evaluation of, 229
—— —— research in, 195–290
—— —— studies of patients, 218
—— —— *The future—and present indicatives*, 290
—— research: *Clinical research for all*, 285
—— —— *Medical research systems in Europe*, 289
Mental development, effects of early malnutrition, 169
—— retardation and behavioural change, 179
—— —— *Assessment for learning in the mentally handicapped*, 193
—— —— *Mental retardation and behavioural research*, 192
Metabolic compartmentation in the brain, 192
Mittler, P. (editor): *Assessment for learning in the mentally handicapped*, 193
Morphine, radioimmunoassay, 83
MORRELL, D. C., *see* KNOX, J. D. E., 209
MORRIS, B. A., *see* MARKS, V., 80
Motilin, radioimmunoassay, 66
Motor nerve regeneration, 122
Muscle, innervation, selective, 122
Myelin, new, characteristics, 187

N

NABARRO, J. D. N.: Radioimmunoassay and saturation analysis. Introduction to symposium, 1
National Health Service: *The changing National Health Service*, 285
—— —— —— mathematical models of balance of care, 262
—— —— —— reorganization, 195
—— —— —— —— *NHS reorganisation: issues and prospects*, 290
—— —— —— *see also* Health services; Medical care
Neill, J. E., *see* Goldberg, E. M., 286
Nerve cells in developing nervous system, 107
—— —— responses to axotomy and related procedures, 112
Nervous system, central, regeneration; immunology of, 135
—— —— —— remyelination in relation to clinical lesions, 186
—— —— —— response to injury, 138
—— —— development and regeneration, 105–194
—— tissues, hormone action in, 131
Neural tube defects, causation; clues from epidemiology, 158
Neurobiology: *Progress in neurobiology*, vol. 1, 192
Neuroimmunology, 135
Neuronal specificity, 116
Neurophysins, radioimmunoassay, 77
NEWMARK, P. A. & GORDON, Y. B.: Haematology; [application of radioimmunoassay and saturation analysis techniques], 86
Nursing services, research into, 248
Nutrition, health education, 280

O

Occupational health practice, 286
Operational research approach in medical care, 257
—— —— typical models, 260
Opiate alkaloids, radioimmunoassay, 83
Oxytocin, radioimmunoassay, 74

P

Pancreozymin, radioimmunoassay, 66
PARISH, P. A.: Sociology of prescribing, 214
Patients, studies of, in evaluation of medical care, 218
Peptide, gastric inhibitory, radioimmunoassay of, 66
—— hormone receptors, 28
—— intestinal, vasoactive, radioimmunoassay of, 66
—— posterior pituitary, radioimmunoassay, 74
Pharmacology, radioimmunological applications in, 80
Pharmacy: *British Pharmaceutical Codex* 1973, 10th ed., 194
—— *British Pharmacopoeia* 1973, 12th ed., 194
Phenothiazines, radioimmunoassay, 84
Phenytoin, radioimmunoassay, 84
Phillis, J. W., *see* Kerkut, G. A., 192
Pituitary glycopeptide hormones, radioimmunoassay, 55
—— posterior, peptides; radioimmunoassay of, 74
Placental alkaline phosphatase, characteristics, 73
—— glycopeptide hormones, radioimmunoassay, 55
Plasmin, radioimmunoassay, 87
Plasminogen, radioimmunoassay, 87
PLAYFAIR, J. H. L.: Production of antibodies and binding reagents; basic immunological principles, 24
—— HURN, B. A. L. & SCHULSTER, D.: Production of antibodies and binding reagents, 24
Prescribing, sociology of, 214
PRESTIGE, M. C.: Axon and cell numbers in the developing nervous system, 107
Prostaglandins, radioimmunoassay, 83
Proteins, binding, sources of, 50
—— synthesis, relation to regeneration in nervous system, 139
Prothrombin, radioimmunoassay, 87
Psychological functions, effects of early malnutrition, 170
Public health: *Health practice research and formalized managerial methods*, 288
—— —— *International Health Regulations (1969)*, 2nd ed., 289

R

Radioactive tracers in radioimmunoassay, preparation and assessment, 18
Radioimmunoassay, 1–103
—— calibration of working standards, 15
—— design, fundamental principles, 4
—— glossary of terms, 103
—— hapten-specific methods, iodinated tracers for, 22
—— historical survey, 3
—— in the diagnostic laboratory, 38
—— principles and theory, 3
—— results, analysis, 9
—— —— expression of, 15
—— specificity, 8
—— —— assessment, 15
—— standardization and standards, 12
—— terminology, 4, 103
Radioligand-receptor assays, endocrine tissue receptors for, 28
Radionuclide, γ-ray-emitting, 22
RATCLIFFE, J. G.: Separation techniques in saturation analysis, 32
Receptors, endocrine tissue, for radioligand-receptor assays, 28
Regan isoenzyme, characteristics, 73

S

Saturation analysis, 1–103
—— —— adsorption methods, 34
—— —— basic principle, 4
—— —— double-antibody method, 34
—— —— fractional precipitation, 34
—— —— separation techniques, 32
—— —— solid-phase methods, 35
Schilling, R. S. F. (editor): *Occupational health practice*, 286
SCHULSTER, D.: Production of antibodies and binding reagents; endocrine tissue receptors for radioligand-receptor assays, 28
—— *see* PLAYFAIR, J. H. L., 24
Secretin, radioimmunoassay, 65
SMART, J. L., *see* DOBBING, J., 164
Smoking hazards, education on, 279
Social environment, and early malnutrition, 171
Social work in general practice, 286
Steroids, analysis, 50
—— —— isotopic tracers for, 52
—— hormone receptors, 30
STRINGER, J., *see* LUCKMAN, J., 257
Synapses, changes in number, 143
—— plasticity, 141

T

TEALE, J. D., *see* MARKS, V., 80
Tetrahydrocannabinol, radioimmunoassay, 84
Thyroid hormones, radioimmunoassay, 93
Thyroid-stimulating hormone, radioimmunoassay, 59
Thyroxine, measurement in serum, 93
—— measurement in urine, 96
—— serum, non-protein-bound, measurement, 97
TIZARD, J.: Early malnutrition, growth and mental development in man, 169
Transcobalamins, radioimmunoassay, 87
Tri-iodothyronine, measurement in serum, 93
—— measurement in urine, 96
—— serum, non-protein-bound, measurement, 97
Tumour-associated antigens, radioimmunoassay, 68

V

Vasopressin, radioimmunoassay, 74
Viruses, radioimmunoassay in detection, 90
Vision, binocular, connexions; role of visual function in patterning of, 145
Visual cortex, maturation, 154
—— —— plasticity of properties in, 155
—— function, connexions, mammalian development, 152
—— —— role in patterning of binocular visual connexions, 145
Visual–motor localization, in infants, 176
—— system, development of functional connexions in mammalia, 152

Vitamin B_{12}, radioimmunoassay, 87
Vitamins, radioimmunoassay, 85
